THE VOLVO PENTA STERNDRIVE JOYSTICK

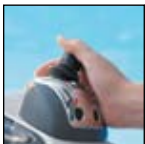

Features and Benefits:

- Easy joystick docking maneuverability
- Low and high RPM Joystick Setting with the push of a button
- Smooth and effortless steering
- Self-centering drives on shut-down
- Easy boating
- Self adjusting trim to optimal joystick angle
- Latest in boating technology

Pushing the joystick to port and your boat swiftly moves sideways making challenging berth spaces easily accessible.

By twisting the top and rotating slightly, you'll be able to combine it with any other movement to compensate for additional wind or current.

You can now direct all of your slow-speed driving by using the new joystick, allowing more flexibility and better ease of use.
